

Virtual Training with Welcome Paws

Support: One-on-one assistance for you and your dog

Involve the Human and Canine Family: Games, tips, and tools for bringing humans and canines together

Ask the Trainer: Access to obedience and behavior modification training

How does this training work? Live online classes consist of your dog trainer being on video instead of in your home or a group dog setting. The Zoom platform is used to walk you through the obedience training process and instructions on how to perform certain dog cues. We demonstrate on one of our dogs or show a video of a client, then we watch you as you practice on your dog and adjust your skills if necessary.

Each lesson will include a recording for you to refer to for homework. This type of training directly creates a bond of trust, respect, and balance. Having an online session instead of in-person allows the dog trainer to get out of the way, so your canine can focus directly on you as their pet parent and “go-to” person.

Choose from one of the packages below. They all include a complimentary flash card game and dog clicker!
